

# Touchstones

*Memories* can be a great source of comfort. Having something to remind us of our loved one is especially precious.

*Touchstones* are made from a small piece of clay, which capture the imprint of your thumb on one side and the thumbprint of your loved one on the other side. The stones are glazed (see colors below) and kiln dried to a hard finish. Keep your Touchstone close to you as a tender reminder of your loved one. The Touchstone can be worn as a necklace, placed in your pocket or in a special place in your home.

*We* are pleased to offer this meaningful experience for you and your family. Donations are appreciated and will allow us to provide touchstones for other families.

If you are interested in creating touchstones with your family, please contact your Social Worker or call 864.224.3358 x3132.

We thank you for letting us serve your family,  
*Hospice of the Upstate*
